## SENIOR FRONT-END ENGINEER

Senior Front-End Engineer and Computer Engineer with 6 years of experience building scalable, high-performance web and mobile applications using modern technologies and user-centered development practices. Specialized in creating responsive and optimized digital experiences by combining usability, scalable architectures, and performance-focused solutions. Passionate about innovation, continuous improvement, AI-assisted development, and delivering impactful products that create real value for users and businesses.

## TRAINING

**2016** — Multimedia UI/UX

**2017–2022** — Computer Engineering

Corporación Universitaria Unisabaneta

Additional Training:

Continuous growth through enterprise projects (**2020–2025**), teamwork, real-world software development, scalable architectures, AI-assisted workflows, Platzi, Udemy, and continuous learning to this day.

## EXPERIENCE

### 2020–2025 LATEST COMPANY: INNVENTA SOFTWARE TECHNOLOGY

During my experience as a Senior Front-End Developer at Innventa Software Technology between 2020 and 2025, I participated in multiple web and mobile development projects, building modern, scalable, and user-focused solutions. I worked with technologies such as Angular, React, Ionic, Flutter, Web3, PHP, and Shopify, applying agile methodologies, best development practices, and scalable architectures to deliver high-performance platforms. I am recognized for quickly adapting to new challenges, collaborating effectively with teams, and constantly pushing myself to achieve new goals while creating functional and innovative products.

### 2025 - 2026 BETY

Worked as a Senior Independent Front-End Developer, leading the design and development of custom digital solutions for web and mobile platforms tailored to business needs. Built scalable and high-performance applications using Flutter for mobile development and React for web platforms, focusing on usability, responsiveness, and optimized user experience. Collaborated directly with clients to define requirements, propose technical solutions, and manage the full development lifecycle from planning and architecture to deployment and support.

## LANGUAGES

- English | Intermediate

## SKILLS

- Advanced expertise in Front-End Engineering using Angular, React, Vue.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, and modern component-based architectures.
- Strong experience building scalable, high-performance web and mobile applications with Flutter, Ionic, SSR/SSG architectures, and modern front-end ecosystems.
- Experience designing scalable Front-End architectures, Micro-Frontends, Design Systems, reusable component libraries, clean code practices, and monorepo project structures for enterprise-level applications.
- Solid experience integrating REST and GraphQL APIs, backend services, third-party platforms, and modern web solutions using PHP and scalable software engineering practices.
- Development of responsive, accessible, and user-centered interfaces focused on UI/UX best practices, Core Web Vitals, usability, and performance optimization.
- Experience implementing unit, integration, and end-to-end testing using Jest, Cypress, and Playwright, including GitHub Copilot-assisted validations and quality checks before Pull Requests (PRs).
- Proficient with Git, GitHub, GitLab, CI/CD pipelines, code reviews, Agile development workflows, and collaborative software engineering environments.
- Experience working with Agile methodologies such as Scrum and Kanban in multidisciplinary teams and fast-paced enterprise development environments.
- Strong knowledge of state management solutions including Redux, Zustand, Context API, and scalable front-end application patterns.
- Familiar with cloud-based and modern deployment environments including Vercel, Firebase, Docker, and modern DevOps-oriented workflows.
- Strong technical decision-making, problem-solving, adaptability, and continuous improvement mindset focused on scalable and maintainable software solutions.
- Passionate about emerging technologies, AI-assisted development, modern software architectures, and building impactful digital products aligned with current industry standards.
